WILL RECOMMEND BIG MARKET FOR CITY

Board of Health Investigates Prevail ing Accommodations and Deems Radical Changes in Order.

Unless L. J. Bowers, who has leased the Continental Hay market for a city markets keeps the place in a sanitary condition, he will not be allowed to operate the place, Mayor J. S. Bransford, who is president of the

lowed to operate the place, Mayor J. S. Bransford, who is president of the board of health, visited the old market this morning, with Dr. M. R. Stewart, health commissioner. When they saw Bowers plans they told him that his place which never do. Bowers' proposition seems to be to make all the money out of it that he can from the farmers who bring produce into the city to sell and establish a feed yard there.

The health board will meet in a day or two and take up the matter which was passed by the council and referred to the health board with power to act upon the matter as it saw fit. Some of the members of the board are in favor to compelling Bowers to lay cement floors and put up fine stalls and then flush every inch of the place out once a day. They are opposed to having a feed yard in the same block because of the flies.

The board is in favor of having a market owned by the city and then compels all the farmers who come here to sell produce to rent a stall. The members think that it would be made self sustaining without any trouble and that would be enought. It could be kept in such a condition, under the city, so that it would be a pleasure to residents to go to the market and buy their vegetables. The board will probably make its report to the council Monday night.

TOOK FRIEND'S ADVICE: HAS NO MORE TROUBLE

"About two years ago my eyes got in such a condition that I was unable to go about. They were terribly inflamed, both the balls and lids. I tried home remedies without relief. Then I decided to go to our family physician, but he didn't help them. Then I tried two more of our most prominent physicians, but my eyes grew continually worse. At this time a friend of mine advised me to try Cuticura Ointment, and after using it about one week my eyes were considerably improved and in two weeks they were almost well. They have never given me any trouble since, I was then sixty-three years old and am they were almost well. They have never given me any trouble since. I was then sixty-three years old and am now sixty-five. I shall never fall to speak a word of praise for the Cuticura Remedies when I have an opportunity, and I trust that this letter may be the means of others being cured as I have been. G. B. It is a curious but satisfactory fact that chronic Bright's Disease, which, according to medical authorities, is an according to medical authorities, is all incurable and fatal disease, is now actually being cured. All rumors is now evident from the recoveries here.

A. H. Otis of the Honolulu Drug Cotells us of two interesting cases. One was swollen with dropsy due to advanced Bright's Disease, and both the patient and his physician had given up hope. Otis kept urging a trial of the new specific until the patient finally consented. Recovery was complete, the patient leaving a few menths later for California, where he now resides.

Another case was that of an officer on one of the Island steamers. He

was in a hospital and considered hope-less when put on the treatment. He has now been back at his post for some time.

The specific that was employed is called Fulton's Compound for Bright's Disease. It seems to be a genuine dis-covery. Otis says there are very few failures, but that it requires patience.—
